1) What do you most want to learn (need help with)?

What I most want to learn in this course:

1. Good user interface techniques and effective strategies for implementing learning objects in educational environments
2. How to best use Flash for developing learning objects
    a. How Flash can be used like Camtasia for capturing and presenting step-by-step computer application training.
    b. Best practices for improving Flash development workflow
    c. How to add HTML text and CSS formatting in Flash animations
    d. Update my Flash scripting skills to ActionScript 3.0

2) In What area do you consider yourself competent and able to help others?

I consider myself to be competent in the following areas of digital design:

1. Designing and building PC systems from piecemeal components
2. Vector-based drawing tools in Illustrator CS4 & CorelDraw 10
3. Bitmapped drawing tools and filters in Adobe Photoshop CS4
4. HTML, CSS, Client & Server-side JavaScript, and ASP 3.0 scripting tools (including databases) in Adobe Dreamweaver CS3 (including WebAssist extensions) and Microsoft Expression Web 2 (including ASP.NET)
5. Video editing tools and filters in Adobe Premiere CS4, and Microsoft Movie Maker
6. Audio Editing tools, filters and effects in Adobe SoundBooth CS4
7. Encoding video and audio formats in Microsoft Expression Encoder 2
8. Creating Adobe Flash CS4 symbols
9. Using embedded symbols in Flash animations
10. Tweeing Flash object positions and properties
11. Using buttons in Flash animations to open URLS and move to frames
12. Basics of using Flash ActionScript MX
